KAIBAB PLATEAU

Hiking into Grand Canyon—how far should you go?

- Have fun
- Be careful
- Seek advice

Use the charts below to plan a safe hike below the canyon rims. Remember that every exhilarating step you take downhill means twice as much work to hike back up. Day-hiking from the rims to the "red zone" destinations shown in the charts below is for experienced hikers only. Hiking to the river and back in one day is

not recommended due to long distances, extreme temperature changes, and an approximately 5,000-foot (1,500-meter) elevation change each way. If you think you have the fitness and expertise to attempt this extremely strenuous hike, please seek advice from a park ranger at the Backcountry Information Center.
